1. Developer Account Login & Setup

TheChaiShop&Co CRM • Salesforce Developer Tutorial

Follow these 5 steps to create and access your free Salesforce Developer Org

1. Go to developer.salesforce.com

Open your browser and navigate to **developer.salesforce.com** — the official Salesforce Developers site

2. Sign up

Click the "Sign up" or "Try for Free" button to create your free Developer account

3. Fill details

Enter your first name, last name, email, role, company (e.g. TheChaiShop&Co), and country. Create a username (unique)

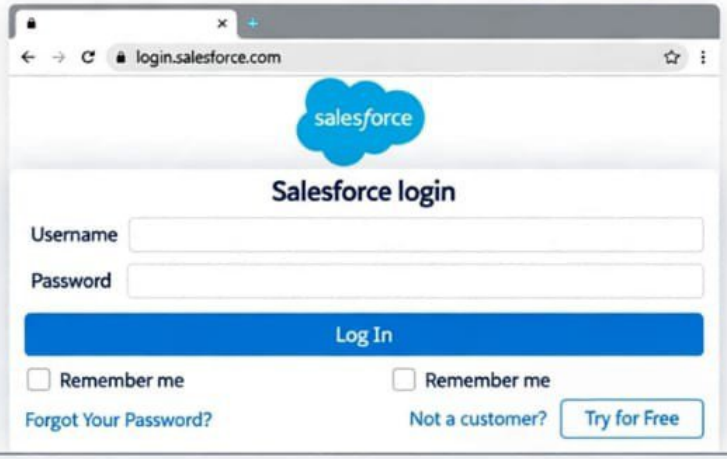

4. Verify email

Check your inbox for the verification email from Salesforce. Click the link to activate your account & set password

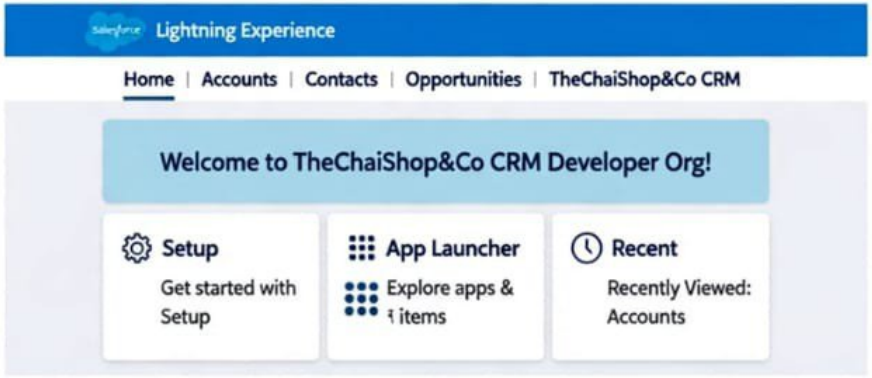

5. Login to Lightning Experience

Log in and you'll be taken to Salesforce Lightning Experience — ready to build apps, objects, and customizations

Salesforce Developer Login Page

After Login — Lightning Experience Home

Free for Developers • No Credit Card Required

Tip: Bookmark **developer.salesforce.com** for quick access

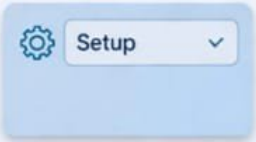

2 & 3. Object Creation & Field Creation - TheChaiShop&Co CRM

Step-by-Step Guide for Salesforce CRM Setup

Object Creation

1. Setup

Click the Gear icon in the top right
→ Select "Setup" from the dowdown menu

2. Object Manager

In the Setup sidebar, click "Object Manager" under the navigation menu

Object Manager

3. Create Custom Object

Click the "Create" dowdown
→ Choose "Create Custom Object"

+ Create → Create Custom Object

4. Define Object Labels

Enter the following custom object labels:

- Customer__c
- Employer__c
- Enterprise__c

5. Save

Review and click "Save" to finalize the custom object creation

Save

Tip: Custom objects use the "__c" suffix automatically in Salesforce

Field Creation

1. Fields & Relationships

Open the newly created object
→ Click "Fields & Relationships" in the left sideboll

Fields & Relationships

2. New Field

Click the "New" button at the top to create a new field

+ New

3. Select Field Type

Choose one of the four field types for your data:

Text Simple text entry for names, addresses	**Picklist** Dropdown with predefinne values
Lookup Links to another Salesforce object	**Master-Detail** Parent-Child relationship, rollups

4. Create Fields Like

Add these sample fields to the Customer__c object:

Customer Name	Text
Phone	Text
Aadhar	Text
PAN	Text

Tip: Use Picklist for Status, Lookup for Employer__c relation, Master-Detail for parent dependency

Salesforce Lightning

4,5,6,7. Tab, Lightning App, Report & App Launcher - TheChaiShop&Co CRM

Step-by-Step Tutorial — Configure your CRM for TheChaiShop&Co | Clean Setup Guide

1 Tab Creation

Setup → **New Custom Object Tab**

- **Navigate: Setup > Tabs → New Custom Object Tab**
- **Select Object:** Choose your custom object (e.g. Order, Product, Inventory)
- **Select Tab Style:** Pick an icon & color — Tea Cup icon, Blue #0176D3
- **Assign to Profiles & Save** → Tab now visible in navigation

2 Lightning App Creation

Navigate: **App Manager > New Lightning App**

- **App Name: TheChaiShop&Co**
- **Description: Chai Shop Sales & Orders CRM**
- **Add Navigation Items:** Home, Orders, Products, Reports, Dashboards

3 Report Creation

Navigate: **Reports > New Report > Select Object**

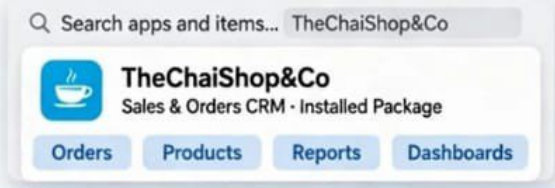

- **Select Object:** Orders (Custom Object)
- **Report Type:** Create Summary Report → Sales Report
- **Group Rows:** By Stage | Group Columns: By Month
- **Add Columns:** Amount, Quantity, Owner
- **Save & Run** → Save as "Monthly Sales Report"

4 Final Step: App Launcher

Click App Launcher (9-dot grid) in top left

- **Search: "TheChaiShop&Co"** in search bar
- **Select App: TheChaiShop&Co** appears in results
- **App opens with all tabs visible:** Home | Orders | Products | Reports | Dashboards

Pro Tip: Assign the app to user profiles in App Manager → App Assignment. Users will now see TheChaiShop&Co in their App Launcher. Combine with Permission Sets for access control.
